An Agile Collaboratory uses a series of teams to solve complex problems by bringing different partners together to achieve a common goal. Through the sharing of best practices and building off of one another’s ideas, innovative solutions are generated to common problems, resulting in win-win solutions. PennDOT’s Agile Collaboratory on Line Painting revealed to the Department best practices, and ways to reduce costs in operating, setting up and cleaning line painting equipment.

A second collaboratory, PennDOT’s Roadside Beautification Agile Collaboratory, resulted in developing a streamlined process where the time frame and cost of beautifying state highway right-of-ways were significantly reduced.
